cloudLibrary has some new and exciting features!

**Digital Library Card(s)**

At the top of your cloudLibrary Home Screen, you will see your library card. Click on the rotate button to flip your card around and show you your library card barcode. You can scan it at a self-checkout!

You can also easily add multiple cards to the same device by clicking on View Cards.

Add new cards to your device.

You can lock* or edit your current card here.

*Locking a card means that you will need a security code in order to use it.

All of the library cards tied to your device will appear here.

**Library Notifications**

Underneath your library card on your Home tab, you will find alerts and notifications from the library.

- See the library calendar and add events instantly to your personal calendar.
- Get notifications about books that are due back. *Swipe or click to snooze or stop this alert.
- See alerts from the library and check out the Twitter feed.
- See any current fees on your card.
See Current Checkouts

Now you can see your PHYSICAL checkouts as well as your DIGITAL checkouts in the My Books tab! Look for your past, present, and future reading under the History, Current, and Holds menus along the top.

Keep Track of Items

When you’re ready to return your materials to the library, click on the shopping bag, and you will see a list of all your physical items. Keep track of what you are packing up!

Troubleshoot

If you run into a problem with cloudLibrary, an easy fix is to Logout of the card you are having issues with.

First, navigate to the “Account” button at the bottom of your screen. Then click on the “Logout” button.
